PROFESSIONAL SUMMARY

Senior Software Developer, Backend Engineer, and AI Platform Engineer with 4+ years of enterprise experience at Infosys designing scalable cloud-native systems, AI-powered enterprise platforms, API ecosystems, and automation solutions across telecom, finance, and education domains. Specialized in Python, FastAPI, Kubernetes, API Gateway engineering, DevSecOps, Generative AI integration, and enterprise platform modernization. Strong expertise in production-grade microservices, AI-assisted workflows, CI/CD automation, observability engineering, secure deployment pipelines, and scalable infrastructure using Next.js, Angular, MongoDB, Docker, and modern cloud-native technologies.

CORE TECHNICAL SKILLS

Programming	Python, Node.js, PHP, C#, Go, Rust, Lua
Frameworks	FastAPI, Django, Flask, Angular, React, Next.js, Express.js
AI & LLM	Generative AI, RAG, Prompt Engineering, AI Agents, LLM Fine-Tuning
Cloud & DevOps	Kubernetes, Docker, Helm, ArgoCD, CI/CD, DevSecOps
API Platforms	Kong Gateway, Akana, Apigee, Azure API Management
Databases	MongoDB, MySQL, SQL Server
Architecture	Microservices, Secure SDLC, Observability, Traffic Governance

PROFESSIONAL EXPERIENCE

Infosys Limited — Technology Analyst | Oct 2024 – Present

- Architected AI-first enterprise API platforms integrating Generative AI and LLM workflows into large-scale enterprise systems.
- Designed scalable backend microservices using Python (FastAPI), Next.js, and cloud-native deployment strategies.
- Engineered enterprise API gateway ecosystems using Kong Gateway, Akana, and Apigee with governance automation and observability.
- Implemented Kubernetes-based CI/CD pipelines improving deployment reliability, scalability, and operational efficiency.
- Built AI-assisted automation workflows using enterprise datasets, MongoDB pipelines, and orchestration tools.

Infosys Limited — Senior Systems Engineer | Oct 2023 – Sep 2024

- Designed secure APIs and automated lifecycle workflows on Akana platform for enterprise-grade systems.
- Integrated DevSecOps controls into CI/CD pipelines enhancing governance, compliance, and release security.
- Developed enterprise full-stack platforms using Angular, Python, MongoDB, and scalable backend architectures.

Infosys Limited — Systems Engineer | Sep 2021 – Sep 2023

- Developed backend services using Python, C#, and Angular for telecom and enterprise applications.
- Managed APIs through Akana and Azure API Management with automation workflows and governance policies.
- Contributed to enterprise platform modernization initiatives and secure engineering practices.

NASSCOM Foundation — Java Developer Trainee Intern | Jun 2020 – Nov 2020

- Completed full-stack Java training covering Java, Spring Boot, JDBC, MySQL, HTML, CSS, and JavaScript.
- Developed end-to-end web applications and backend integration workflows during apprenticeship program.
- Worked on frontend integration, debugging, database management, and secure application development practices.

MAJOR PROJECTS & PRODUCTS

MSM Classes & Jasika AI

Designed and developed MSM Classes, an AI-powered educational ecosystem with secure backend APIs, cloud-native deployment pipelines, automation systems, smart learning workflows, and scalable full-stack infrastructure. Developed Jasika AI, an adaptive AI educational assistant focused on intelligent learning automation and AI-assisted interactions.

Samvaad Secure Collaboration Platform

Contributed to development of secure communication and collaboration systems with encrypted workflows, scalable backend infrastructure, privacy-focused architecture, and Bharat-hosted deployment strategies.

AI-Driven API Automation Platform

Designed LLM-assisted automation frameworks to streamline API lifecycle management, reduce engineering overhead, and accelerate onboarding across enterprise ecosystems.

Enterprise Data Platform

Built secure enterprise systems using Angular, Python, MongoDB, and Nginx with encryption modules, scalable APIs, observability tooling, and cloud-native deployment architecture.

Cloud-Native API Gateway Deployment

Implemented production-grade Kong Gateway and Kubernetes-based service mesh deployments with governance automation, observability, and traffic control policies.

Custom Hosting Control Panel

Developed backend-driven infrastructure management systems with secure deployment orchestration, automated provisioning workflows, monitoring integrations, and scalable administration capabilities.

EDUCATION

B.Tech — Computer Science & Engineering
Dr. A.P.J. Abdul Kalam Technical University | 2017 – 2021
First Class Honours — 86.67%

Class XII — CBSE Board (PCM + Informatics Practices - Java)
MGM Higher Secondary School, Bokaro | 2014 – 2016
84.44%

Class X — CBSE Board
Children Delight School, Chapra | Passed in 2014
CGPA: 9.4

CERTIFICATIONS

Kong API Gateway Operations	Kubernetes Fundamentals
GitHub Copilot Fundamentals	Developing AI-First Web Applications
Microsoft Azure Fundamentals	Infosys DevSecOps Platform
SnapLogic for Developers	Infosys Topaz Fabric 101
